WEATHER OF CONCERN

Weather of Concern

NORTHERN CALIFORNIA

- Fire weather concerns exist for far northeastern California through Sunday evening, 08/19/18.
- The San Joaquin Valley Air Pollution Control District will keep the Air Quality Alert in effect for the mountain and foothill portions of Madera, Fresno, and Tulare Counties due to smoke impacts from the Ferguson wildfire west of Yosemite National Park. The Air Pollution Control Districts in Mariposa and Tuolumne Counties have also issued Air Quality Alerts for their counties.
 - The Air Quality Alerts will be in effect until the fire is extinguished.
 - Exposure to particle pollution can cause serious health problems, aggravate lung disease, cause asthma attacks and acute bronchitis, and increase risk of respiratory infections.

SOUTHERN CALIFORNIA

- Monsoonal moisture will bring some thunderstorms mainly to the mountains this afternoon.

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

***** Widespread NW-NE Gusts to 25-30 far N Sunday and Monday *****

***** SW-W Gusts to 25-30 mph Along and East of the Cascade-Sierra Crest Sunday Afternoon *****

A small area of NE winds gusting to 25 mph over the higher terrain in Del Norte County tonight. Temperatures will be 3-7 degrees above normal and minimum Relative Humidity (RH) in the driest inland areas will be 8-18%.

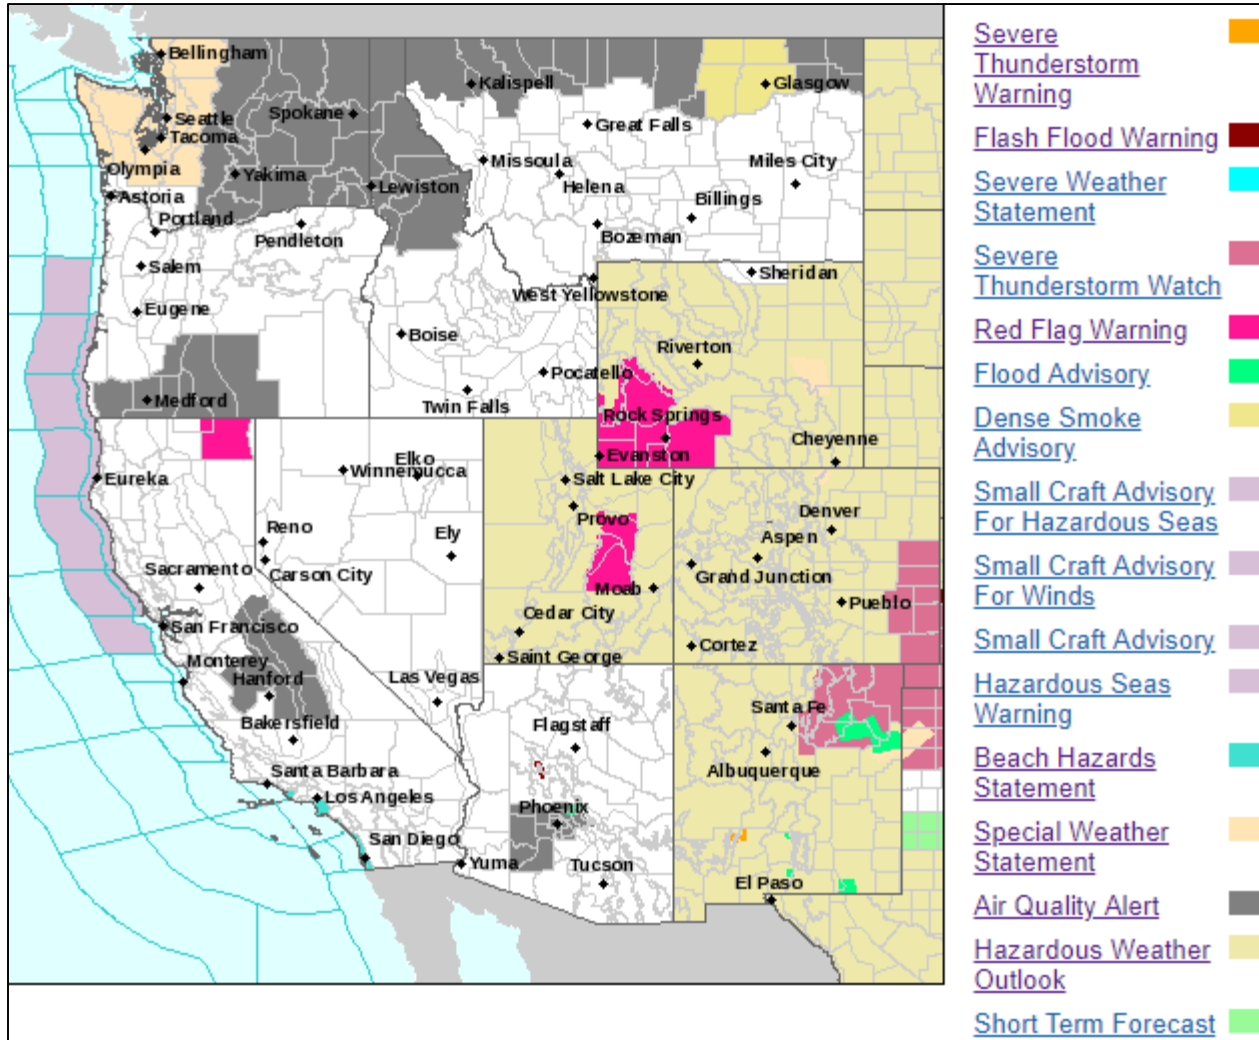

Beginning Sunday another low pressure trough will set up along the coast. S-SW winds will gust to 25-30 mph along and east of the Cascade-Sierra crest. Areas near the OR state line in Siskiyou and Del Norte Counties will see NW-NE winds gust to 25-30 mph Sunday and Monday. Inland minimum RH will continue around 8-18%, while temperatures remain a bit above normal. As a disturbance passes to our north within the trough on Monday partly cloudy skies will develop in far northern areas. At this time shower and thunderstorm activity is expected to remain in OR. A weak low pressure trough and general SW flow will remain over the region Tuesday through the end of the week, keeping temperatures just a bit warmer than normal with low RH inland and onshore flow conditions in coastal areas. Afternoon SW-W winds will gust to 25 mph or so in the usual areas.

SOUTHERN CALIFORNIA

High pressure over the Desert Southwest will cause temperatures to remain near to a little above normal through the end of next week, with upper 70s and 80s across the mountains and 90s to 102 in the valleys. There will be little change in humidity across Southern California through the end of next week, but minimum humidity will drop into the single digits and teens across Central California starting Sunday. An isolated afternoon shower or thunderstorm will be possible over the mountains and higher desert locations of Southern California east and south of I-15 this weekend. The shower and thunderstorm threat will increase across the mountains and deserts of Southern California east of I-15 starting Monday, with scattered showers and thunderstorms Tuesday through Thursday. Showers and thunderstorms will decrease across Southern California Friday. Only an isolated shower or thunderstorm will be possible across Central California from the Sierra Crest eastward Tuesday through Thursday. Gusty winds will occur near thunderstorms, otherwise no significant winds are anticipated across the region through the end of next week.
